

CORBIN SADDLERY SIZING CHART

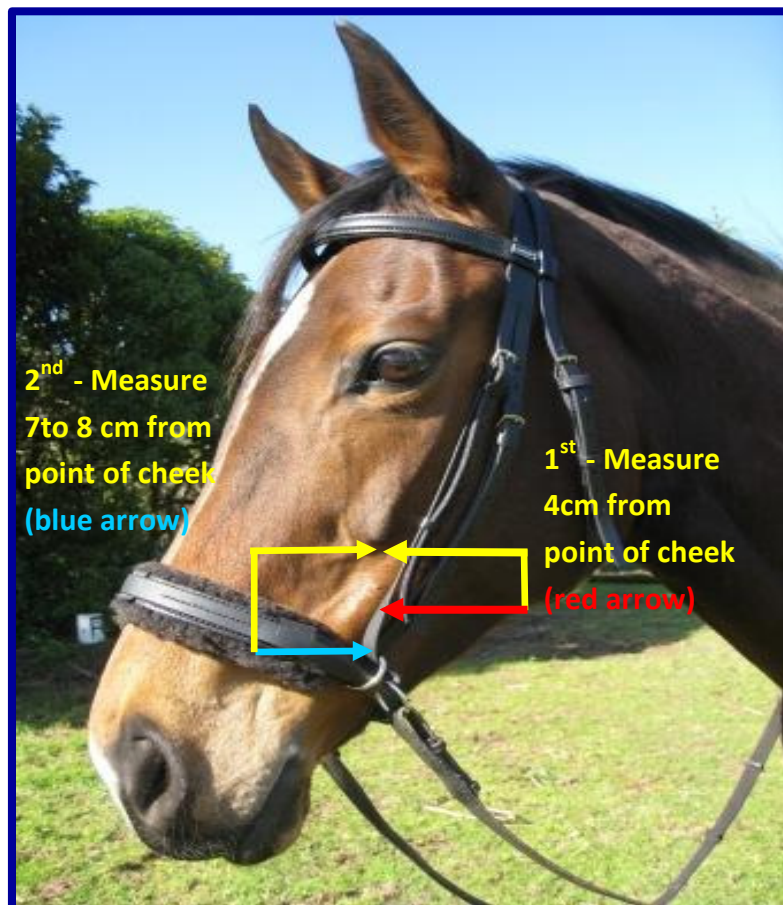

Please note the noseband sizes give you a maximum and minimum circumference, meaning the largest and smallest size of the noseband that can fit around your horse's nose. *Your horse's circumference measurements need to be EQUAL or SMALLER than the 1st measurement and EQUAL or LARGER for the 2nd measurement.*

When measuring your horse you will need two measurements;

- ❖ **1st Measurement** - The circumference of where a standard cavesson noseband which would sit approximately 4cm down from point of cheek. (Measurement taken where **RED ARROW** indicates.)
- ❖ **2nd Measurement** - The circumference of where the noseband would sit when riding bitless. Take measurement approximately 7cm – 8 cm down from the point of the cheek. (Measurement taken where **BLUE ARROW** indicates.)

The reason for the 2nd measurement is that when you are riding bitless, the noseband is generally lower than that of a standard cavesson noseband. Once you have the maximum and minimum measurements of your horse then refer to our **SIZE LIST** to see where your horse or pony would fit best.

- ❖ For the brow band measurements, we have provided the Corbin brow band sizes, which are longer to accommodate the wider headpiece. The second size is an approximate length of a standard brow band on a **non-Corbin** bridle. To measure take a standard brow band that you know fits your horse, lay it flat and take its length and then find a similar size from our list.

SIZE LIST

SMALL PONY

BROW BAND	NOSEBAND
Corbin - 35 cm	1st Measurement – 52cm (RED)
Standard - 30 cm	2nd Measurement – 36cm (BLUE)

PONY
